Pomoc - opis funkcji

Solve problems faster with our interactive tools.

**DataVis**

Explore material properties using DataVis, our interactive data visualization tool.

Get started with our [video tutorial](#) or use one of the pre-built DataVis projects.

**narzędzie DataVIS**

**Spreadsheets**

Save time and ensure accuracy by using our calculator tools to solve frequently used engineering equations.

These Excel templates embed data and formulas to streamline complex calculations.

**Videos**

Learn step-by-step solutions to real-world engineering problems.

900+ instructional videos - created exclusively for AccessEngineering by engineering faculty - cover every major discipline.

**Wykłady video**

**Graphs & Tables**

Analyze key data quickly and accurately.

Thousands of interactive graphs and downloadable tables make it easy to analyze essential engineering data and confidently use it in real-world projects.

**Wykresy i tabele**

2.2. Flow Characteristics

Each throttling valve has a *flow characteristic*, which describes the relationship between the valve coefficient ( $C_v$ ) and the valve stroke. In other words, as a valve opens, the flow characteristic—which is an inheritance to the design of the selected valve—allows a certain amount of flow...
